LIST OF CONTENTS

NUMBER 1

i Softstrip® data strip containing the table of contents of this issue

R. D. Colberg and **M. Morari** 1 Area and capital cost targets for heat exchanger network synthesis with constrained matches and unequal heat transfer coefficients

L. K. E. Achenie and **L. T. Biegler** 23 A superstructure based approach to chemical reactor network synthesis

D.-Q. Qian 41 An improved method for fault location of chemical plants

H.-M. Ku and **I. Karimi** 49 Completion time algorithms for serial multiproduct batch processes with shared storage

J. D. Seader, M. Kuno, W.-J. Lin, S. A. Johnson, K. Unsworth and **J. W. Wiskin** 71 Mapped continuation methods for computing all solutions to general systems of nonlinear equations

P. A. Clark and **A. W. Westerberg** 87 Bilevel programming for steady-state chemical process design—I. Fundamentals and algorithms

P. A. Clark 99 Bilevel programming for steady-state chemical process design—II. Performance study for nondegenerate problems

G. M. Ostrovsky, M. G. Ostrovsky and **G. W. Mikhailow** 111 Discrete optimization of chemical processes

NUMBER 2

i Softstrip® data strip containing the table of contents of this issue

A. Lucia and **J. Xu** 119 Chemical process optimization using Newton-like methods

M. M. L. Guimarães, P. F. R. Regueiras and **J. J. C. Cruz-Pinto** 139 Mass transfer and dispersed phase mixing in liquid–liquid systems—II

H. S. Kheshgi 149 Transient reactor analysis by approximate Jacobian factorization

H. Mehdizadeh and **J. M. Dickson** 157 Solving nonlinear differential equations of membrane transport by orthogonal collocation

J. C. Fagley and **B. Carnahan**	161	The sequential-clustered method for dynamic chemical plant simulation
H. A. Preisig and **R. E. White**	179	On the design of a simple solver for nonlinear two-point boundary value problems
J. Cerdá, M. R. Galli, N. Camussi and **M. A. Isla**	197	Synthesis of flexible heat exchanger networks—I. Convex networks
J. Cerdá and **M. R. Galli**	213	Synthesis of flexible heat exchanger networks—II. Nonconvex networks with large temperature variations
R. E. Carmola and **E. H. Chimowitz**	227	Analysis of modal reduction techniques for the dynamics of general tridiagonal systems

NUMBER 3

G. V. Reklaitis	i	Announcement—Best Paper of 1988
A. R. Ciric and **C. A. Floudas**	241	Application of the simultaneous match–network optimization approach to the pseudo-pinch problem
S. A. Mendoza-Bustos, A. Penlidis and **W. R. Cluett**	251	Robust adaptive process control of a polymerization reactor
D. Singer	259	Fault tree analysis based on fuzzy logic
S. S. Ashour and **O. T. Hanna**	267	A new very simple explicit method for the integration of mildly stiff ordinary differential equations
O. T. Hanna	273	The use of integral global extrapolation in the numerical solution of ordinary differential equations
E. C. Yamalidou, E. P. Patsidou and **J. C. Kantor**	281	Modeling discrete-event dynamical systems for chemical process control—a survey of several new techniques
R. Lakshmanan and **G. Stephanopoulos**	301	Synthesis of operating procedures for complete chemical plants—III. Planning in the presence of qualitative, mixing constraints
S. G. Hall, S. Ahmad and **R. Smith**	319	Capital cost targets for heat exchanger networks comprising mixed materials of construction, pressure ratings and exchanger types
J. Leonard and **M. A. Kramer**	337	Improvement of the backpropagation algorithm for training neural networks
	I	Softstrip® data strip containing the table of contents of this issue

NUMBER 4/5

NEW TRENDS IN PROCESS CONTROL

Y. Arkun	v	Preface
		Robust Process Control
P. J. Campo and **M. Morari**	343	Robust control of processes subject to saturation nonlinearities
E. Zafiriou	359	Robust model predictive control of processes with hard constraints
H. Rotstein, J. Bandoni, A. Desages and **J. Romagnoli**	373	Mathematical programming with linear uncertain constraints—application to robust control
V. Manousiouthakis	381	A game theoretic approach to robust controller synthesis
T. Khambanonda and **A. Palazoglu**	391	Robustness studies for multivariable feedback systems using refined eigenvalue inclusion regions (REIR)
S. Skogestad and **P. Lundström**	401	Mu-optimal *LV*-control of distillation columns
		Nonlinear Control
J.-P. Calvet and **Y. Arkun**	415	Design of P and PI stabilizing controllers for quasi-linear systems
L. C. Limqueco and **J. C. Kantor**	427	Nonlinear output feedback control of an exothermic reactor
C. Kravaris and **P. Daoutidis**	439	Nonlinear state feedback control of second-order nonminimum-phase nonlinear systems
W. C. Li, L. T. Biegler, C. G. Economou and **M. Morari**	451	A constrained pseudo-Newton control strategy for nonlinear systems
J. W. Eaton and **J. B. Rawlings**	469	Feedback control of chemical processes using on-line optimization techniques
P. M. Hidalgo and **C. B. Brosilow**	481	Nonlinear model predictive control of styrene polymerization at unstable operating points
		Learning and AI Systems
J. T.-Y. Cheung and **G. Stephanopoulos**	495	Representation of process trends—Part I. A formal representation framework
J. T.-Y. Cheung and **G. Stephanopoulos**	511	Representation of process trends—Part II. The problem of scale and qualitative scaling

D. J. Cooper and **A. M. Lalonde** 541 Process behavior diagnostics and adaptive process control

M. R. Basila Jr, G. Stefanek and **A. Cinar** 551 A model–object based supervisory expert system for fault tolerant chemical reactor control

L. H. Ungar, B. A. Powell and **S. N. Kamens** 561 Adaptive networks for fault diagnosis and process control

N. Bhat and **T. J. McAvoy** 573 Use of neural nets for dynamic modeling and control of chemical process systems

B. E. Ydstie 583 Forecasting and control using adaptive connectionist networks

I Softstrip® data strip containing the table of contents of this issue

NUMBER 6

i Softstrip® data strip containing the table of contents of this issue

K. K. Trivedi, B. K. O'Neill, J. R. Roach and **R. M. Wood** 601 Systematic energy relaxation in MER heat exchanger networks

Gh. Juncu 613 Multigrid solution for the catalytic chemical reactor model

M. Shacham 621 A variable order method for solution of a nonlinear algebraic equation

A. Aggarwal and **C. A. Floudas** 631 Synthesis of general distillation sequences—nonsharp separations

M. A. Malachowski, R. E. Stephenson, J. P. Oppenheim and **R. J. Steffensen** 655 Vectorization of fluid property calculations within a petroleum reservoir simulator

A. W. Alsop and **T. F. Edgar** 665 Nonlinear control of a high-purity distillation column by the use of partially linearized control variables

J. C. Wu, L. T. Fan and **L. E. Erickson** 679 Three-point backward finite-difference method for solving a system of mixed hyperbolic–parabolic partial differential equations

Short Notes

P. Grosdidier 687 Analysis of interaction direction with the singular value decomposition

A. M. Helal and **S. S. Elnashaie** 691 Numerical construction of bifurcation diagrams for non-linear complex reaction networks in catalytic reactors

NUMBER 7

i Softstrip® data strip containing the table of contents of this issue

V. Venkatasubramanian, R. Vaidyanathan and **Y. Yamamoto** 699 Process fault detection and diagnosis using neural networks—I. Steady-state processes

G. J. Birky and **T. J. McAvoy** 713 A general framework for creating expert systems for control system design

B. Linnhoff and **S. Ahmad** 729 Cost optimum heat exchanger networks—1. Minimum energy and capital using simple models for capital cost

S. Ahmad, B. Linnhoff and **R. Smith** 751 Cost optimum heat exchanger networks—2. Targets and design for detailed capital cost models

J. Viswanathan and **I. E. Grossmann** 769 A combined penalty function and outer-approximation method for MINLP optimization

S. D. Grantham and **L. H. Ungar** 783 A first principles approach to automated trouble-shooting of chemical plants

Ph. de Vallière and **D. Bonvin** 799 Application of estimation techniques to batch reactors—III. Modelling refinements which improve the quality of state and parameter estimation

A. A. Humffray 809 Variations on the algorithm of Theliander and Grén for estimating the densities of mixed electrolyte solutions

NUMBER 8

i Softstrip® data strip containing the table of contents of this issue

G. Stephanopoulos, G. Henning and **H. Leone** 813 MODEL.LA. A modeling language for process engineering—I. The formal framework

G. Stephanopoulos, G. Henning and **H. Leone** 847 MODEL.LA. A modeling language for process engineering—II. Multifaceted modeling of processing systems

M. Rovaglio, E. Ranzi, G. Biardi and **T. Faravelli** 871 Rigorous DYnamics and COntrol of continuous DIstillation Systems—simulation and experimental results

W. L. Rion and **V. Van Brunt** 889 Differential geometry based homotopy continuation

L. N. Sridhar and **A. Lucia** 901 Tearing algorithms for separation process simulation

S. Vasantharajan, J. Viswanathan and L. T. Biegler — 907 — Reduced successive quadratic programming implementation for large-scale optimization problems with smaller degrees of freedom

Short Notes

B. Jayadeva, Y. S. N. M. Rao, M. Chidambaram and K. P. Madhavan — 917 — Nonlinear controller for a pH process

M. C. Kimble and R. E. White — 921 — A five-point finite difference method for solving parabolic partial differential equations

I — Corrigendum

NUMBER 9

i — Softstrip® data strip containing the table of contents of this issue

T. Gundersen and I. E. Grossmann — 925 — Improved optimization strategies for automated heat exchanger network synthesis through physical insights

C. C. Lakshmanan and O. E. Potter — 945 — Cinematic modelling of dynamics of countercurrent systems

V. G. Dovì and O. Paladino — 957 — Use of fuzzy optimization algorithms for the solution of a class of ill-posed problems in data analysis

D. A. Straub and I. E. Grossmann — 967 — Integrated stochastic metric of flexibility for systems with discrete state and continuous parameter uncertainties

G. L. Jones — 987 — Semi-implicit method for the solution of systems of stiff ordinary differential and differential-algebraic equations

E. N. Pistikopoulos and T. A. Mazzuchi — 991 — A novel flexibility analysis approach for processes with stochastic parameters

A. Skoczylas and J. Dziak — 1001 — Separation efficiency of thin-layer evaporators

J. F. Pekny, D. L. Miller and G. J. McRae — 1009 — An exact parallel algorithm for scheduling when production costs depend on consecutive system states

N. Brauner and R. Lavie — 1025 — Feedforward quality control through inventory manipulation in periodically perturbed mixed accumulators

E. Tsotsas and E.-U. Schluender — 1031 — Numerical calculation of the thermal conductivity of two regular bidispersed beds of spherical particles

NUMBER 10

W. B. Dolan, P. T. Cummings and **M. D. Le Van**	1039	Algorithmic efficiency of simulated annealing for heat exchanger network design
T. B. Co and **B. E. Ydstie**	1051	System identification using modulating functions and Fast Fourier Transforms
M. V. Ariyapadi, E. B. Nauman and **J. W. Haus**	1067	Application of discrete Fourier transforms to a fourth-order diffusion equation
J. B. Riggs and **R. R. Rhinehart**	1075	Comparison between two nonlinear process-model based controllers
S. Vasantharajan and **L. T. Biegler**	1083	Simultaneous strategies for optimization of differential-algebraic systems with enforcement of error criteria
Y. Arkun and **J. Downs**	1101	A general method to calculate input–output gains and the relative gain array for integrating processes
R. Salcedo, M. J. Gonçalves and **S. Feyo de Azevedo**	1111	An improved random-search algorithm for nonlinear optimization
T. F. McKenna and **M. F. Malone**	1127	Polymer process design—I. Continuous production of chain growth homopolymers
T. F. Yee, I. E. Grossmann and **Z. Kravanja**	1151	Simultaneous optimization models for heat integration—I. Area and energy targeting and modeling of multi-stream exchangers
T. F. Yee and **I. E. Grossmann**	1165	Simultaneous optimization models for heat integration—II. Heat exchanger network synthesis

NUMBER 11

T. F. Yee, I. E. Grossmann and **Z. Kravanja**	1185	Simultaneous optimization models for heat integration—III. Process and heat exchanger network optimization
E. Fantini, L. Tognotti and **A. Tonazzini**	1201	Drop size distribution in sprays by image processing
P. Mizsey and **Z. Fonyo**	1213	Toward a more realistic overall process synthesis—the combined approach
L. Pellegrini and **G. Biardi**	1237	Chaotic behaviour of a controlled CSTR

SELECTED PAPERS FROM THE SYMPOSIUM "COMPUTER APPLICATION IN THE CHEMICAL INDUSTRY"

P. Deuflhard, U. Nowak and **M. Wulkow**	1249	Recent developments in chemical computing

G. Stephanopoulos	1259	Artificial intelligence in process engineering—current state and future trends
R. Bachmann, L. Brüll, Th. Mrziglod and **U. Pallaske**	1271	On methods for reducing the index of differential algebraic equations
M. Bär and **M. Zeitz**	1275	A knowledge-based flowsheet-oriented user interface for a dynamic process simulator
K. Georgakopoulos and **H. Hofmann**	1281	Kinetic investigations of complex reactions using a concentration-controlled recycle reactor
A. Kröner, P. Holl, W. Marquardt and **E. D. Gilles**	1289	DIVA—an open architecture for dynamic simulation
L. Lang and **E. D. Gilles**	1297	Nonlinear observers for distillation columns
P. Mizsey and **Z. Fonyo**	1303	A predictor-based bounding strategy for synthesizing energy integrated total flowsheets
G. Fichtner, H.-J. Reinhart and **D. W. T. Rippin**	1311	The design of flexible chemical plants by the application of interval mathematics

NUMBER 12

J. Markoš, A. Brunovská and **Z. Letková**	1317	Optimal catalyst pellet activity distributions—fixed-bed reactor with catalyst deactivation
M. A. Kramer and **J. A. Leonard**	1323	Diagnosis using backpropagation neural networks—analysis and criticism
D. J. Cooper, R. F. Hinde Jr and **L. Megan**	1339	Pattern-based adaptive process control
H. Das, P. T. Cummings and **M. D. Le Van**	1351	Scheduling of serial multiproduct batch processes via simulated annealing
Z. Kravanja and **I. E. Grossmann**	1363	PROSYN—an MINLP process synthesizer
F. E. Finch, O. O. Oyeleye and **M. A. Kramer**	1379	A robust event-oriented methodology for diagnosis of dynamic process systems
C. A. Floudas and **V. Visweswaran**	1397	A global optimization algorithm (GOP) for certain classes of nonconvex NLPs—I. Theory
V. Visweswaran and **C. A. Floudas**	1419	A global optimization algorithm (GOP) for certain classes of nonconvex NLPs—II. Application of theory and test problems
M. Czok and **G. Guiochon**	1435	Comparison of the results obtained with different models for the simulation of preparative chromatography
